

AcceIium Olympics 2021

An online educational event that brings together children from all over the world.

Rules and Regulations

Description:

The Accelium Olympic is a yearly online event based on different smart games and challenges students will need to solve to gain points!

The learning environment in which the tournament takes place is playful, intuitive, and allows students to progress at a personal pace.

The tournament will last 7 days, during which students can move freely between games.

The games lay the foundations for a deep understanding of diverse, high order skills and allow students to discover strategies for themselves.

The self-discovery method develops curiosity, creativity, and self-confidence.

And as with any game, students are allowed to fail, try again, and play until they succeed!

Who is it for?

- *Schools Students*
- *Learning centers*
- *Homeschooling students*
- *Sporting Clubs*
- *Anyone who loves to play and is looking for a challenge!*

Note that there is no need to have prior knowledge or acquaintance with Accelium!

Format:

This year there will be 4 tournaments running at the same time and allocated to the following age groups:

Tournament 1:

Aimed for students in Years 1-2

Tournament 2:

Aimed for students in Years 3-4

Tournament 3:

Aimed for students in Years 5-6

Tournament 4:

Is aimed at students in Years 7-8

The tournament will be an individual event. That is, each student will be able to earn individual points and compete with other students in their age category.

Please note - the students' cumulative score will appear on a scoreboard on the Accelium website along with the student's name, his school, and their country.

Tournament scores:

A student can score in each game between one star (lowest score) and three stars (highest score).

The stars are only accepted when the student completes the level (students can track their stars and their points in the workout Map).

There is no limit to the number of attempts; students are allowed to play again and again at the same level - the highest score will be saved.

Olympic Schedule:

<i>Registration</i>	<i>April 1st - June 1st</i>
---------------------	-----------------------------

<i>Tournament</i>	<i>June 7th – June 14th</i>
-------------------	-----------------------------
